Roll no: 240701496 Phone: 7708605966

Branch: REC

Department: I CSE FD

Batch: 2028

Degree: B.E - CSE

## NeoColab\_REC\_CS23231\_DATA STRUCTURES

REC\_DS using C\_Week 3\_MCQ\_Updated

Attempt : 1 Total Mark : 20 Marks Obtained : 18

Section 1: MCQ

1. What will be the output of the following code?

```
#include <stdio.h>
#define MAX_SIZE 5
int stack[MAX_SIZE];
int top = -1;
void display() {
    if (top == -1) {
        printf("Stack is empty\n");
    } else {
        printf("Stack elements: ");
        for (int i = top; i >= 0; i--) {
              printf("%d ", stack[i]);
        }
        printf("\n");
    }
}
```

```
void push(int value) {
  if (top == MAX_SIZE -1) {
    printf("Stack Overflow\n");
  } else {
    stack[++top] = value;
  }
int main() {
  display();
  push(10);
  push(20);
  push(30);
display();
  push(40);
  push(50);
  push(60);
  display();
  return 0;
}
```

#### Answer

Stack is emptyStack elements: 30 20 10Stack OverflowStack elements: 50 40 30 20 10

Status: Correct

Marks: 1/1

What is the advantage of using a linked list over an array for

2. What is the advantage of using a linked list over an array for implementing a stack?

## Answer

Linked lists can dynamically resize

Status: Correct Marks: 1/1

3. In a stack data structure, what is the fundamental rule that is followed for performing operations?

## Answer

Last In First Out

2407074.96 Status: Correct Marks: 1/1

4. A user performs the following operations on stack of size 5 then which of the following is correct statement for Stack?

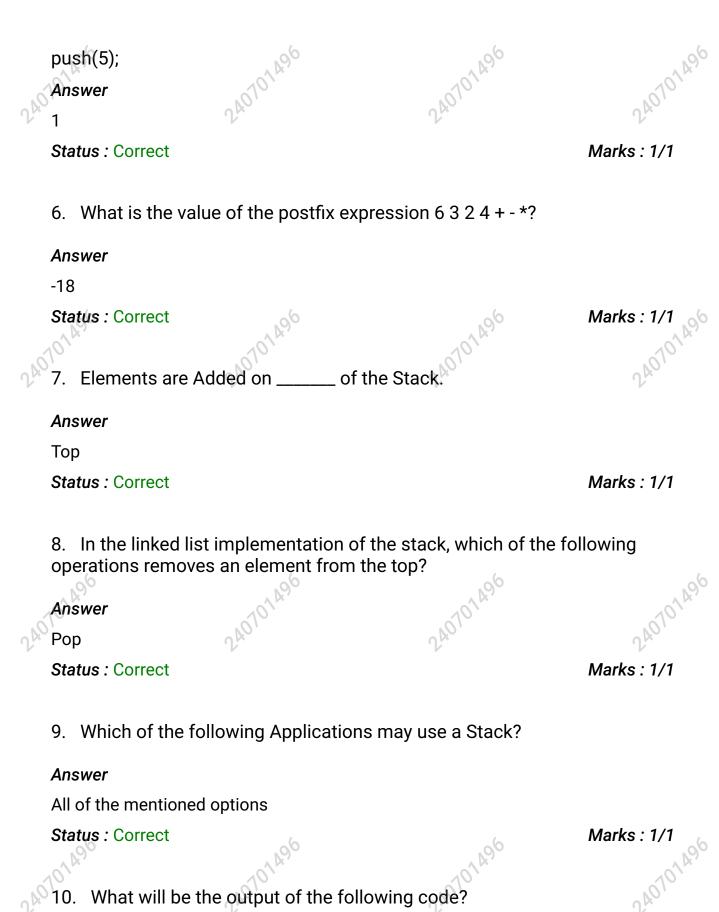

```
push(1);
    pop();
    push(2);
    push(3);
    pop();
push(2);
    pop();
    push(4);
    pop();
    pop();
    push(5);
    Answer
    Underflow Occurs
    Status: Correct
```

Marks : 1/1

5. The user performs the following operations on the stack of size 5 then at the end of the last operation, the total number of elements present in the stack is

240707496

```
push(1);
    pop();
    push(2);
    push(3);
    pop();
    push(4);
    pop();
pop();
```

```
2407074.96
#include <stdio.h>
#define MAX_SIZE 5
void push(int* stack, int* top, int item) {
   if (*top == MAX_SIZE - 1) {
     printf("Stack Overflow\n");
     return;
   stack[++(*top)] = item;
int pop(int* stack, int* top) {
   if (*top == -1) {
     printf("Stack Underflow\n");
     return -1;
   return stack[(*top)--]
int main() {
   int stack[MAX_SIZE];
   int top = -1:
   push(stack, &top, 10);
   push(stack, &top, 20);
   push(stack, &top, 30);
   printf("%d\n", pop(stack, &top));
   printf("%d\n", pop(stack, &top));
   printf("%d\n", pop(stack, &top));
   printf("%d\n", pop(stack, &top));
   return 0;
}
Answer
302010Stack Underflow-1
                                                                      Marks: 1/1
Status: Correct
```

11. When you push an element onto a linked list-based stack, where does the new element get added?

## Answer

At the end of the list

Status: Wrong Marks: 0/1

12. The result after evaluating the postfix expression 10 5 + 60 6 / \* 8 - is

Answer

142

Status: Correct Marks: 1/1

13. Which of the following operations allows you to examine the top element of a stack without removing it?

Answer

Peek

Status: Correct Marks: 1/1

14. In an array-based stack, which of the following operations can result in a Stack underflow?

Answer

Popping an element from an empty stack

Status: Correct Marks: 1/1

15. Consider the linked list implementation of a stack.

Which of the following nodes is considered as Top of the stack?

Answer

Last node

Status: Wrong Marks: 0/1

```
16. What will be the output of the following code?
#include <stdio.h>
#include <stdio.h>
   #define MAX_SIZE 5
   int stack[MAX_SIZE];
   int top = -1;
   int isEmpty() {
      return (top == -1);
   int isFull() {
      return (top == MAX_SIZE - 1);
   void push(int item) {
    oif (isFull())
        printf("Stack Overflow\n");
      else
        stack[++top] = item;
    int main() {
      printf("%d\n", isEmpty());
      push(10);
      push(20);
      push(30);
      printf("%d\n", isFull());
      return 0;
   Answer
    10
```

17. Here is an Infix Expression: 4+3\*(6\*3-12). Convert the expression from Infix to Postfix notation. The maximum number of symbols that will appear on the stack AT ONE TIME during the conversion of this expression?

Marks: 1/1

Answer

Status: Correct

Marks: 1/1 Status: Correct

18. Pushing an element into the stack already has five elements. The stack size is 5, then the stack becomes

### Answer

Overflow

Status: Correct Marks: 1/1

19. Consider a linked list implementation of stack data structure with three operations:

push(value): Pushes an element value onto the stack.pop(): Pops the top element from the stack.top(): Returns the item stored at the top of the stack.

Given the following sequence of operations:

push(10);pop();push(5);top();

What will be the result of the stack after performing these operations?

## Answer

The top element in the stack is 5

Marks : 1/1 Status: Correct

20. What is the primary advantage of using an array-based stack with a fixed size?

## Answer

Efficient memory usage

Status: Correct Marks: 1/1
